

Print a picture of the erupting Sun?
Create one using the screenshot tool
in the upper menu on helioviewer.org.
Save your picture on the USB-stick
and bring it to the print station.

Explore

the really
big eruptions

How to find

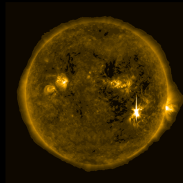

a really big eruption
if you don't already know the date?

Use the timeline on helioviewer.org.

Select a time range.

Zoom in 2-3 times.

Click on the peak to get
a preview image of the Sun.

Explore more

Click 'View on helioviewer.org'
to explore the image in full detail
and all colours & wavelengths.

Be creative!

You may become the next solar scientist 😊
